

No: overall availability

Yes: new introductions

No: general meat purchases

Yes: counterpart-specific purchases

A1

Exposure form × *crossed* *Exposure type* × *crossed* *Outcome*
 Count → Alt Protein Items → Total Purchases
 Proportion → Vegan Items → Nonvegan Purchases
 Vegetarian Items → Meat Purchases
 36 outcome-exposure pairings
 18 primary outcome-exposure pairings
 30 pooled estimates, 6 total-purchase models folded in

A2

Exposure form × *crossed* *Exposure type* 1-to-1 matched *Outcome*
 Presence (Binary) → Breakfast Meat Analogs → Breakfast-Style Meat Purchases
 Count → Ground Meat Analogs → Ground Meat Purchases
 → ~~Whole-Muscle Analogs~~ → ~~Whole-Muscle Meat Purchases~~
 10 outcome-exposure pairings
 → Chicken Analogs → Chicken Purchases
 → Dairy Analogs → Dairy Purchases
 10 primary outcome-exposure pairings
 → Egg Analogs → Egg Purchases
 8 pooled estimates, 2 total-purchase models folded in

A3

Exposure form × *crossed* *Exposure type* × *crossed* *Outcome*
 New Introduction → Alt Protein Items → Total Purchases
 → Nonvegan Purchases
 → Meat Purchases
 → Chicken/Fish Purchases
 Vegetarian Purchases
 Vegan Purchases
 6 outcome-exposure pairings
 3 primary outcomes
 10 pooled estimates, 1 total-purchase model folded in

A4

Exposure form × *crossed* *Exposure type* 1-to-1 matched *Outcome*
 New Introduction → Breakfast Meat Analogs → Breakfast-Style Meat Purchases
 → Ground Meat Analogs → Ground Meat Purchases
 → Whole-Muscle Meat Purchases
 → ~~Chicken Analogs~~ → ~~Chicken Purchases~~
 → ~~Dairy Analogs~~ → ~~Dairy Purchases~~
 3 outcome-exposure pairings
 3 primary outcomes
 → ~~Egg Analogs~~ → ~~Egg Purchases~~
 4 pooled estimates, 1 total-purchase model folded in

Sensitivity analysis: Within-customer effects

8 exposure-outcome pairings
 5 primary outcomes
